

CUSTOMER SUCCESS STORY

Warehouse Management and Scanner System Integration

Metrologic Selects Control for Tunnel Scanner Systems

Challenge

New Jersey-based Metrologic recently won a \$1.8 million order for their state-of-the-art HoloTunnel scanning system. The tunnel scanner handles more than 6.1 million packages each week for Purolator Courier, Ltd.—Canada's leading overnight courier company. A key element of the system was the integration of the scanner with the warehouse management system, scales, dimensioning equipment, and other devices.

Technology Solution

Metrologic selected Control's RocketPort® serial connectivity products as a critical component of their scanning system. The combined Metrologic/Control solution enables Purolator to scan precise weights and sizes, improving billing accuracy and resulting in the recovery of previously lost revenue.

Control—The Warehouse and Distribution Center Connection

Control's connectivity products include in-server multiport cards and LAN/WAN attached and USB serial hubs. Call our Industrial Automation Team today and let us help you get connected.

"We chose Control's highly reliable RocketPort® connectivity products because they solved our need for collecting simultaneous data from scanners reading different sides of parcels. With the performance and reliability of the RocketPort products, we won a \$1.8 million order from Canada's leading overnight courier company, Purolator Courier, Ltd."

— Frank Lodge
Industrial Scanner Product Manager, Metrologic
