TURN-KEY GUEST SERVICE SYSTEM INTEGRATION FOR THE LODGING INDUSTRY

Lodging Link Premier seamlessly integrates hundreds of guest service systems for communication with your property management system

Lodging Link Meets the Integration Challenge

Lodging Link eliminates the need for property management system (PMS) vendors to create their own interfaces. Save money, time, and manpower by using Lodging Link Premier's turn-key system to quickly and easily integrate hundreds of guest service systems. Hotel systems include: PBX, voice mail, call accounting, in-room Internet access, point-of-sale, in-room movie, keyless entry, mini bar, and energy management systems.

An Integrated Software and Hardware Solution

Comtrol's Lodging Link Premier provides a turn-key system to interface hotel devices.

- **Application Software**—Lodging Link Premier provides a uniform communication channel to the PMS.

- **Interface Software**—Customize with an extensive selection of hotel device interfaces for the needs at each site.

- **Hardware**—Solid-state, 8-port application server running Microsoft Windows® 10 for easy integration with existing systems

- **Support**—Continuing development support and turn-key installation. Premier is accessible remotely via Windows Remote Desktop

connect. communicate. control.

Lodging Link Premier

Part Number: 30161-5

SPECIFICATIONS

OPERATING SYSTEM
Microsoft Windows 10

APPLICATION SOFTWARE
Lodging Link PTS Loaded

HARDWARE
Processor
   Intel® Celeron® N3160 1.6GHz
Memory   4GB
Storage
   52.2GB Solid State Drive
Serial Connectors (8) DB9 Male
Ethernet Ports   (2) 10/100 BASE-T
Housing   Rugged Black Steel
Unit Weight   8.2 lb
                 3.7 kg

Unit with Cable Weight
                 9.3 lb
                 4.2 kg

Product Shipping Weight
                 12 lb
                 5.4 kg

Dimensions
   10" x 9.89" x 4"
   25.4 x 12.12 x 10.16 cm

ELECTRICAL SPECIFICATIONS
Internal Power Supply
Line-in
   115/230VAC 50/60Hz 0.5/0.2A
Surge Protection
   15KV ESD - Serial Line
US Style Power Cord
Euro Style Power Cord

ENVIRONMENTAL SPECIFICATIONS
Operating Temperature   0 to 50ºC
Humidity
   (Non-Condensing)   0% to 95%
Altitude   0 to 10,000 ft
                 0 to 3,480 m

REGULATORY APPROVAL MARKS
RoHS2 Compliant under CE
FCC Part 15 Subpart B Class A

CE

EXCEPTIONAL BENEFITS

Lodging Link Premier is a solid state, turn-key system running the Windows 10 OS with Comtrol's Lodging Link PTS integration software. It offers significant benefits for the developers of hospitality systems, as it functions as a universal protocol translator.

Legacy System Support

•   Integrate your existing PMS and hotel devices quickly and easily, avoiding costly system changes or installation problems. Once Lodging Link Premier is installed, you have the capability to add hotel systems—simply order a new Lodging Link Premier interface from our automated delivery system and you're connected!

Thin-Server Delivery

•   Connect the Lodging Link Premier via a serial or Ethernet port with no impact on your existing computing resources.

If your PMS server goes down, Lodging Link Premier keeps running and buffers data until reconnected! And since it's an application-specific solid-state computer, it's much less expensive to maintain than a general-purpose PC or server.

Eliminate Interface Development

•   The single PMS to Lodging Link interface eliminates the need for a PMS vendor to write hundreds of interfaces. It also enables hotel device vendors to make their product instantly compatible with all PMS systems that use Lodging Link.

Contact Sales (information below) to obtain a Lodging Link Developer Kit. Developing to UHLL is quick and easy with the Lodging Link Developer Kit.
